the 1930s, it was piston engines that powered early aircraft.

Compared to a twin-engine piston aircraft that sports two engines, one piston engine (or reciprocating engine) powers a single-engine piston aircraft, which are also known as piston singles.

work in combination with a propeller to produce thrust.

Turbojet and turbofan engines produce thrust by increasing the velocity of air flowing through the engine. All of these powerplants also drive the various systems that support the operation of an aircraft.
