This book takes a surprising look at the hidden world of broccoli, connecting American consumers concerned about their health and diet with Maya farmers concerned about holding onto their land and making a living. Compelling life stories and rich descriptions from ethnographic fieldwork among supermarket shoppers in Nashville, Tennessee and Maya farmers in highland Guatemala bring the commodity chain of this seemingly mundane product to life. For affluent Americans, broccoli fits into everyday concerns about eating right, being healthy, staying in shape, and valuing natural foods. For Maya farmers, this new export crop provides an opportunity to make a little extra money in difficult, often risky circumstances. Unbeknownst to each other, the American consumer and the Maya farmer are bound together in webs of desire and material production.

This book provides a comprehensive examination of how theory of mind develops. Building on previous work, this book pulls together' all that we have learned in the past 25 years to make sense of this powerful everyday theory. This book includes chapters on evolution and the brain bases of theory of mind; updated treatments and explanations of theory; infant theory of mind as the platform for developments in later childhood, and later developments from middle childhood to adulthood, including how we understand extraordinary minds such as those that belong to gods, superheroes, or supernatural beings.

Straightforward, practical, and focused on realistic examples, Business and Professional Writing: A Basic Guide for Americans is an introduction to the fundamentals of professional writing. The book emphasizes clarity, conciseness, and plain language. Guidelines and templates for business correspondence, formal and informal reports, brochures and press releases, and oral presentations are included. Exercises guide readers through the process of creating and revising each genre, and helpful tips, reminders, and suggested resources beyond the book are provided throughout.

In a surprising look at the hidden world of broccoli, this richly drawn ethnography traces the global commodity chain between U.S. consumer and Maya farmer, examining the connections between desire and material production.

Language, this book argues, is political from top to bottom, whether considered at the level of an individual speaker's choice of language or style of discourse with others (where interpersonal politics are performed), or at the level of political rhetoric, or indeed all the way up to the formation of national languages. By bringing together this set of topics and highlighting how they are interrelated, the book will function well as a textbook on any applied or sociolinguistic course in which some or all of these various aspects of the politics of language are covered.
