Entomology: Novel Approaches—builder2.hpd-collaborative.org

Data from HTDS provide a strong understanding on different aspects of pest biology and spatial repellents are a novel approach to control arthropod pests. Due to the importance of HTDS in arthropods belonging to diverse fields and the sublethal activity of spatial repellents, both HTDS and spatial repellents can provide a reliable method to control insect disease vectors and arthropod pests.

This novel approach of blocking inflammation and/or accelerating the resolution of inflammation before a surgical procedure also holds promise for patients who do not have cancer. " More than 30 percent of healthy individuals harbor microscopic cancers," Panigraphy said.

Entomology & Nematology News—Agriculture and Natural—

A new approach in capacity strengthening for entomology and vector control was thus required. A novel approach in capacity strengthening. In 2006 the ANVR conducted a rapid assessment of capacities in entomology and vector control at the level of ministries of health 4 in African countries. In order to systematize the assessment, it was felt fundamental to clarify the minimum operating standards for effective vector surveillance by national malaria control programmes.

A novel approach in capacity strengthening

Our research draws on a range of approaches, from microbial ecology, metagenomics, metatranscriptomics and the use of gnotobiotic models to understand how insect biology is influenced by their gut microbiomes, and how insects could be determining the host-specificity of these microbiomes.
