PHYSICS MCQ FOR NEET EXAM: NCERT BASED QUESTIONS WITH MODEL TEST The National Eligibility cum Entrance Test-Under Graduate (NEET (UG)), succeeded from All India Pre-Medical Test (AIPMT) is an entrance examination in India for students who wish to study undergraduate medical courses (MBBS) and dental courses (BDS) in government or private medical colleges and dental colleges in India. The undergraduate NEET (UG), for MBBS and BDS courses, is currently conducted by the National Testing Agency (NTA), which provides the results to the Directorate General of Health Services at the Ministry of Health and Family Welfare. Prior to 2019, the test was administered by the Central Board of Secondary Education (CBSE) in partnership with Prometric Testing Pvt Ltd headquartered in the USA. NEET-UG replaced the All India Pre Medical Test (AIPMT) and all individual MBBS exams conducted by states or colleges themselves in 2013. However, many colleges and institutes had taken a stay order and conducted private examinations for admission to their MBBS and BDS courses. NEET-UG is a single entrance test for admissions to more than 66,000 MBBS and BDS seats across India. In 2018 NEET exam, around 80% of the candidates wrote the exam in English, 11% in Hindi, 4.31% in Gujarati, 3% in Bengali and 1.86% in Tamil. Undergraduate courses at the All India Institute of Medical Sciences in New Delhi and Jawaharlal Institute of Postgraduate Medical Education & Research (JIPMER) are outside the NEET ' s purview, as these institutes were set up by separate laws. There are questions asked from Physics, Chemistry, and Botany & Zoology. There are 45 questions from each of the sections. A correct response gives the candidate 4 marks and 1 mark is deducted for every wrong answer. No marks are deducted if the candidate has not attempted a question. The total time duration is of 3 hours. NEET UG syllabus consists of concepts taught in standard 11 and 12 in the Indian School Systems. (Physics, Chemistry, Biology and Maths) NEET-UG is currently conducted (2019 and onwards) by the National Testing Agency (NTA). Formerly, it was conducted by the Central Board of Secondary Education, from 2013 to 2018.

The past few decades have seen the increasing use of evidence in all aspects of healthcare. The concept of evidence-informed healthcare began in the 1990s as evidence-informed practice, and has since become widely accepted. It is also accepted that the training of medical graduates must be informed by evidence obtained from educational research. This book utilizes an evidence-informed approach to improve discipline-based undergraduate medical curricula. Discipline-based undergraduate medical curricula represent a widely adopted choice for undergraduate medical education around the world. However, there have been criticisms leveled against the discipline-based approach. One of the shortcomings cited is that students are insufficiently equipped to meet the challenges of today ' s healthcare. As a result, various strategies have been proposed. One option, currently in vogue, is the outcome-based approach, wherein the exit behaviors of medical graduates are explicitly examined and used to guide the educational process. The shortcomings present in discipline-based undergraduate medical curricula can be overcome by the strengths of these strategies. This book recommends improving discipline-based undergraduate medical curricula by combining several strategies, including the adoption of an outcome-based approach and the use of evidence-informed implementable solutions. The book is relevant for all faculty, administrators and policymakers involved in undergraduate medical education, and can also be used as a resource for faculty development.
