If interrupted business cash flow is causing rough seas for you right now, then these 12 Tips are exactly what you need to get you back on course. This simple-to-understand book teaches you how to look at your cash flow, and what impacts it, in easy bite-sized pieces. Each succinct Tip has an accompanying worksheet that you can download, print off, and complete. There's nothing more stressful than wondering how you're going to honor an invoice to a vendor or make payroll. If you're tired of the feast or famine cycle in your business accounting, Cheryl Mucha, CPA, has been helping local and small business owners like you keep more of their hard-earned money with these valuable cash flow insights.

Landlubbers joke that sailors are always wanting to head off to the ends of the earth, but Chris Santella takes that life-changing desire very seriously. In this, the third installment in his immensely successful "Fifty Places" series, Santella assembles a crew of the world's greatest championship racers and professional adventurers and persuades them to disclose their favorite destinations around the globe. Interviewees include some of the best-known men and women in the sport: Tom Whidden and Gary Jobson (members of the winning 1987 America's Cup crew), Jeff Johnstone (of J-Boats), award-winning sailing writer Lin Pardey, and many others. The amazingly diverse places they've selected range from clubby East Coast ports (Marblehead, Annapolis), to idyllic tropical refuges (Ilha Grande, Brazil; the Polynesian atoll of Mopelia), to some of the most hair-raisingly treacherous waters on earth (Cape Horn). Coastlines around the world—even Antarctica and the Arctic—are represented, and the chosen spots include some spectacular inland waters, such as the Bras d'Or Lakes and the North Channel of Lake Huron. For each of the 50 places, the sailor recommending the venue spins an entertaining yarn about his or her experience there, and each description is accompanied by a make you want to go there now photograph.

## Sailing Ten Years and 20,000 Miles In Search of Surf and Self

John Kretschmer is sailing's practical philosopher – as much a doer as a thinker. And that is the overarching theme of this chronicle of a sailing life. Often amusing, sometimes poignant, occasionally terrifying but always inspiring, his deeply personal account is a welcome reminder of the good life waiting at sea. With hundreds of thousands of nautical miles under his keel, John's adventures have taken him several times around the world, with challenging crossings of the Atlantic and the Pacific, a narrow escape from a coup in Yemen, an unlikely deliverance from a coral reef off Belize as well as more serene, introspective passages where trade winds are blowing and stories are flowing. His crew has included CEOs, actors, writers, teachers, kids – in essence, everyone. John's narrative is interwoven with practical tips and advice in seamanship, but also, and just as importantly, his hard-won insights about making the most of our lives. He truly believes we find out who we really are, and what we are capable of, far from the shackles of land, when we find a place where time changes shape – days may merge into one another, but minutes are memorable. To live adventurously is to live more fully, and that is the life John Kretschmer continues to live. In this book he shares his simple profundities that will inspire those who live to sail, and those seeking something more rewarding from life.

The only sailing manual you will ever need, covering everything from sailing basics to making repairs and mastering navigation. The undisputed market leader in sailing guides, this fully revised and updated sailing manual, with a foreword by quadruple Olympic gold medallist Sir Ben Ainslie, answers questions about any sailing situation, with thorough coverage of all aspects of sailing and boat ownership. In DK's The Complete Sailing Manual, former British national champion Steve Sleight offers a wealth of expert advice and guidance in the form of a complete course on seamanship, which is brought to life with breathtaking action photography and clear instructions. Fully revised, this new edition features all of the latest developments in sailing--including foiling, long-distance cruising, and high-speed apparent-wind sailing--and navigation, with technology such as modern performance systems and electronic navigation. It also highlights the latest rules, regulations, and best practices necessary for every avid sailor, from the novice to the seasoned seaperson. Includes essential information, handy diagrams, and step-by-step illustrations, The Complete Sailing Manual is the ultimate sailing ebook to keep by your side when you're out on the waves.

A revised and updated guide to the essentials of a writer's craft, presented by a brilliant practitioner of the art Completely revised and rewritten to address the challenges and opportunities of the modern era, this handbook is a short, deceptively simple guide to the craft of writing. Le Guin lays out ten chapters that address the most fundamental components of narrative, from the sound of language to sentence construction to point of view. Each chapter combines illustrative examples from the global canon with Le Guin's own witty commentary and an exercise that the writer can do solo or in a group. She also offers a comprehensive guide to working in writing groups, both actual and online. Masterly and concise, Steering the Craft deserves a place on every writer's shelf.

The Bahamas is a nation with about one thousand islands and cays, many of which are remote and uninhabited. The unique geography of The Bahamas includes shallow banks and coral reefs as well as water over 4000 feet deep. Scattered about the banks are blue holes, vertical caves that often lead down to underwater cave systems. Blue holes are incredible places to freedive. Barrier reefs between the deep ocean and the islands often produce excellent surfing waves. The water is full of wildlife, including hundreds of species of tropical fish, sharks, rays, eels, turtles, and whales. I set out from Jacksonville, Florida, to explore some of the most remote islands in March and April of 2018 sailing alone in Sobrius, my 30' sailboat, a Dufour Arpege. I dove on coral reefs almost every day, as well as five or six blue holes. I surfed three point breaks, and I found much more adventure than I ever expected. I documented the journey in this, my third book, Journey to the Ragged Islands. I also am documenting the journey on my YouTube channel, Paul Trammell, in a series of videos. In addition to dramatic and immersive prose describing the joys and difficulties of the journey, I also include a lot of singlehanded-sailing technique, as well as descriptions of the islands I visited and GPS coordinates of all the places I dropped anchor. Islands I visited include Eleuthera, Cat Island, Long Island, the Jumentos Cays, the Ragged Islands, Rum Cay, Conception Island, and the Exuma Cays. I hope you enjoy the book as much as I enjoyed writing it!

“A great summer read for fans of Jennifer Weiner and Emily Giffin.” (Library Journal) A trio of college friends who reunite aboard a cruise ship experience an unforgettable vacation in this compelling novel from the author of The Summer of Good Intentions, which was hailed as “everything a summer read should be” by Elin Hilderbrand. Three college roommates are celebrating a twentieth wedding anniversary by taking a cruise to Bermuda. As the ship pulls away from the pier, everyone is looking forward to lounging by the pool, sipping sunset cocktails, and reminiscing. Abby, the mother hen of the group, will be celebrating her wedding anniversary in style, even as she and her husband keep a secret from the group. Ambitious career woman Caroline happily anticipates several stress-free days away from her magazine job with her boyfriend, Javier, who may or may not be finally inspired to propose. And single mom Lee (annoyingly gorgeous and irresistibly popular in college) hopes she'll win back the affections of her formerly sweet daughter Lacey, who after her first year in college, has inexplicably become a little bit of a monster. As the balmy pink shores of Bermuda come into view, tensions simmer, and old jealousies flare, sending the temperature from soothing to scorching in this engrossing tale of three best friends on a vacation they won't soon forget—but not for the reasons they expect.

The story of global sport is the story of expansion from local development to globalized industry, from recreational to marketized activity. Alongside that, each sport has its own distinctive history, sub-cultures, practices and structures. This ambitious new volume offers state-of-the-art overviews of the development of every major sport or classification of sport, examining their history, socio-cultural significance, political economy and international reach, and suggesting directions for future research. Expert authors from around the world provide varied perspectives on the globalization of sport, highlighting diverse and often underrepresented voices. By putting sport itself in the foreground, this book represents the perfect companion to any social scientific course in sport studies, and the perfect jumping-off point for further study or research. The Routledge Handbook of Global Sport is an essential reference for students and scholars of sport history, sport and society, the sociology of sport, sport development, sport and globalization, sports geography, international sports organizations, sports cultures, the governance of sport, sport studies, sport coaching or sport management.

This book contains selected papers that address a variety of topics related to the design, development and operation of unmanned and fully autonomous sailing boats. These papers were presented in the 9th International Robotic Sailing Conference, in association with the 9th World Robotic Sailing Championship that took place in Viana do Castelo, Portugal from the 5th to 10th of September 2016. The book is divided in three parts, each focusing on key aspects of robotic sailing. The first part addresses the design, construction and validation of autonomous sailboat platforms, including their rigs, appendages and control mechanisms. The second part is devoted to the development of sensors and algorithms to enhance the performance of robotic sailing boats, in terms of their speed, course control and manoeuvring ability. Finally, the papers in the last part are dedicated to the improvement of behaviours required for the accomplishment of complex autonomous missions. Robotic sailing is a relatively new multidisciplinary area of research, with a recognized great potential for persistent ocean observation. Using the wind for boat propulsion is something mankind has been doing for centuries. Automating and optimizing the sailing process in the harsh marine environment is an ever present challenge which is now promising to bear fruit.
