Settlement Analysis |  
Geotechnical Software GEO5 |  
Fine

Soil consolidation refers to the mechanical process by which soil changes volume gradually in response to a change in pressure.

# Download Free Settlement Program Excel Soil

**Consolidation**  
This happens because soil is a two-phase material, comprising soil grains and pore fluid, usually groundwater. When soil saturated with water is subjected to an increase in pressure, the high volumetric stiffness of water compared to the soil matrix

# Download Free Settlement Program Excel Soil

Consolidation  
means that the water initially  
absorbs all the change in  
pressure without changing  
volume, creating excess pore  
water pres
