Italy, like the rest of Europe, owes a lot to the 'Columbian exchange'. As a result of this process, in addition to potatoes, Europe acquired maize, tomatoes and most types of beans. All are basic elements of European diet and cookery today. The international importance of the potato today as the world's most cultivated vegetable highlights its place in the Columbian exchange. While the history of the potato in the United States, Ireland, Britain and other parts of northern Europe is quite well known, little is known about the slow rise and eventual fall of the potato in Italy. This book aims to fill that gap, arguing

why the potato's 'Italian' history is important. It is both a social and cultural history of the potato in Italy and a history of agriculture in marginal areas. David Gentilcore examines the developing presence of the potato in elite and peasant culture, its place in the difficult mountain environment, in family recipe notebooks and kitchen accounts, in travellers' descriptions, agronomical treatises, cookery books, and in Italian literature.

Mario Rigoni Stern was born in 1921 in Asiago, in the mountains of northeastern Italy. Throughout his literary career, he has remained deeply attached to the region of his birth, its peasant customs, its dialect, its seasonal cycles and shifting historical fortunes. Tonle Bintarn's story takes place in the mountains of the Veneto region, which once bordered the Austro-Hungarian Empire and where smuggling was a means of subsistence for the peasant population. Having run afoul of a patrol of revenue agents, Tonle must seek refuge beyond the frontier in Central Europe, where year after year he lives by doing odd jobs and working, among other things, as an itinerant print peddler, a horse trainer in Hungary, and a gardener in a Prague castle. But every winter he returns secretly to his home and family, until finally a pardon is granted. By now his children are grown and he has little to do but tend his sheep. Meanwhile, the times are changing, social values are disintegrating under the impact of modernization, and Europe moves ever closer to disaster. During the devastation of the First World War, the occupation and ultimate destruction of his village, and his own internment in an Austrian camp, it is Tonle's loyalty to his roots and his

stubborn devotion to his task as a shepherd that persist and make him a quiet symbol of heroism and human endurance.

"A small community of the plateau of Asiago worn out by the Great War: rubble everywhere, poverty, unemployment. Who does not migrate in front of him [has] only a dangerous profession, that of "recovering" beat the mountain to find remnants of war for resale to wholesalers of metals for pennies. James, the protagonist of the novel, he learned the craft as a child with his father. In the silence of the mountains, learn to converse with the missing soldiers, but also to understand and decipher the secret language of plants and animals"--ibs.it web page.

"Ascendete al regno degli dei ad Angkor Wat e precipitate nell'inferno della prigione di Tuol Sleng. La Cambogia, con la sua storia a un tempo tragica e affascinante, vi invita in uno straordinario presente" (Nick Ray, Autore Lonely Planet). La guida comprende: esperienze straordinarie; personalizza il tuo viaggio; scelte d'autore.

"C'è qualcosa di magico in questo regno affascinante che disorienta e al tempo stesso ammalia i viaggiatori. In Cambogia il mondo antico e quello moderno si incontrano offrendo un'avventura autentica". La guida comprende: mappa dei templi di Angkor; avventure all'aperto; fuori dai percorsi più battuti; cibo e bevande.

Rethinking the ways global history is envisioned and conceptualized in diverse countries such as China, Japan, Mexico or Spain, this collection considers how global issues are connected with our local and national communities. It examines how the discipline had evolved in various historiographies, from Anglo Saxon to southern European, and its emergence in Asia with the rapid development of the Chinese economy motivation to legitimate the current uniqueness of the history and economy of the nation. It contributes to the revitalization of the field of global history in Chinese historiography, which have been dominated by national narratives and promotes a debate to open new venues in which important features such as scholarly mobility, diversity and internationalization are firmly rooted, putting aside national specificities. Dealing with new approaches on the use of empirical data by framing the proper questions and hypotheses and connecting western and eastern sources, this text opens a new forum of discussion on how global history has penetrated in western and eastern historiographies, moving the pivotal axis of analysis from national perspectives to open new venues of global history.

Destruction of habitat due to urban sprawl, pollution, and deforestation has caused population declines or even extinction of many of the world's approximately 2,600 snake species. Furthermore, misconceptions about snakes have made them among the most persecuted of all animals, despite the fact that less than a quarter of all species are venomous and most species are beneficial because they control rodent pests. It has become increasingly urgent, therefore, to

develop viable conservation strategies for snakes and to investigate their importance as monitors of ecosystem health and indicators of habitat sustainability. In the first book on snakes written with a focus on conservation, editors Stephen J. Mullin and Richard A. Seigel bring together leading herpetologists to review and synthesize the ecology, conservation, and management of snakes worldwide. These experts report on advances in current research and summarize the primary literature, presenting the most important concepts and techniques in snake ecology and conservation. The common thread of conservation unites the twelve chapters, each of which addresses a major subdiscipline within snake ecology. Applied topics such as methods and modeling and strategies such as captive rearing and translocation are also covered. Each chapter provides an essential framework and indicates specific directions for future research, making this a critical reference for anyone interested in vertebrate conservation generally or for anyone implementing conservation and management policies concerning snake populations.

For most of us, traveling means visiting the most beautiful places on Earth—Paris, the Taj Mahal, the Grand Canyon. It's rare to book a plane ticket to visit the lifeless moonscape of Canada's oil sand strip mines, or to seek out the Chinese city of Linfen, legendary as the most polluted in the world. But in *Visit Sunny Chernobyl*, Andrew Blackwell embraces a different kind of travel, taking a jaunt through the most gruesomely polluted places on Earth. From the hidden bars and convenience stores of a radioactive

wilderness to the sacred but reeking waters of India, Visit Sunny Chernobyl fuses immersive first-person reporting with satire and analysis, making the case that it's time to start appreciating our planet as it is—not as we wish it would be. Irreverent and reflective, the book is a love letter to our biosphere's most tainted, most degraded ecosystems, and a measured consideration of what they mean for us. Equal parts travelogue, expose, environmental memoir, and faux guidebook, Blackwell careens through a rogue's gallery of environmental disaster areas in search of the worst the world has to offer—and approaches a deeper understanding of what's really happening to our planet in the process.
