Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. The "Silver Bible" -- thoroughly revised, updated and redesigned Interior designers, architects, and other design professionals can still turn to the field's beloved "Silver Bible" for a wealth of information related to the design and planning of residential and commercial interiors. But now, Time-Saver Standards for Interior Design and Space Planning, Second Edition goes even further to truly make the classic interior design reference the standard in its field. From standard furniture dimensions to architectural woodwork details, you'll find a vast array of time-saving data and details. Editors Joseph DeChiara, Julius Panero, and Martin Zelnik have brought together contributions from well-known architectural and interior design firms to give you details derived from actual designs and working drawings, showing various solutions for typical design problems encountered in interior architecture. You get a wide range of typical layouts and residential spaces, offices, conference rooms, and reception areas, in addition to details of bars, restaurants, and public toilets. This exciting new edition includes new international examples and metrification - and provides you with full coverage of healthcare spaces, educational spaces; home offices; videoconferencing spaces; green design; project forms and schedules. Two outstanding sections cover historic styles and woodworking.

Interior designers, architects, and other professionals can now locate a wealth of information related to the design and construction of residential and commercial interiors. From space planning to furniture, this is invaluable.

Access to the entire range of design and construction data

Standards for the design of interior spaces should be based on the measurement of human beings and their perception of space, with special consideration for disabled, elderly, and children

A practical approach to planning residential spaces Residential Interior Design: A Guide To Planning Spaces is the industry-standard reference for all aspects of residential space planning, with a practical focus on accessible design, ergonomics, and how building systems affect each space. This new third edition has been updated with the most recent code information, including the 2015 International Residential Code and the International Green Construction Code, and new content on remodeling. Packed with hundreds of drawings and photographs, this book illustrates a step-by-step approach to design that applies to any residential space, and ensures that the most important factors are weighted heavily in the decision making process. Daily use is a major consideration, and the authors explore the minimum amount of space each room requires to function appropriately while examining the host of additional factors that impact bedrooms, bathrooms, kitchens, hallways, and more. Detailed information about accessibility is included in each chapter, making this book a reliable design reference for "aging in place" and universal design. The new companion website features teaching tools and a variety of learning supplements that help reinforce the material covered. Interior design is a fundamental component of a residential space, and a required skill for architecture and design professionals. This book is a complete reference on all aspects of residential design, and the factors that make a space "work." Design spaces with primary consideration of daily use Account for building systems, accessibility, human factors, and more Get up to date on the latest residential interior building codes Plan interiors for any home, any style, and any budget Designing a residential interior is about more than choosing paint colors and furniture—it's about people, and how they interact and use the space. It's about shaping the space to conform to its function in the best possible way. Residential Interior Design provides clear, comprehensive guidance on getting it right every time.

An important addition to the Time-Saver Standards Series, this book offers top-flight guidance for architects and builders who need to select any tpe of product, system, component, material, or assembly for any job. Provides easy-to-understand guidance on how various materials function, considers key issues in product selection, and offers general information on the full range of product types. Organized by CSI MasterFormat--the product specification system most commonly used in construction and in the Sweet's catalogs. Cross-referenced to the UniFormat system, which indexes products by the sequence of assembly in design and construction--a real plus when engaged in preliminary design and cost-estimating.
