Alzheimer's disease - more resources | Alzheimer's Society

Introduction. Evidence-based practice has been promoted in all healthcare levels in the NHS (Department of Health, 2012). This is done to ensure that interventions are supported by current evidence in healthcare and have been found to be effective for most patients (Pearson et al., 2009). The use of evidence-based practice is rooted in the belief that patients should only receive quality care (Pearson et al., 2009).
